2(C)			
3(A)			

4(G)		 <p>Intensity Slices plot for 4(G). The plot shows a central peak with a radius of approximately 100 units. The intensity is highest at the center and decreases towards the edges. The plot is titled "Intensity Slices" and includes a legend for intensity values.</p>	 <p>Heatmap and line graph for 4(G). The heatmap shows a central peak with a radius of approximately 100 units. The line graph shows the intensity profile along the x-axis, with a peak at the center. The plot is titled "Intensity Slices" and includes a legend for intensity values.</p>
5(B)		 <p>Intensity Slices plot for 5(B). The plot shows a central peak with a radius of approximately 100 units. The intensity is highest at the center and decreases towards the edges. The plot is titled "Intensity Slices" and includes a legend for intensity values.</p>	 <p>Heatmap and line graph for 5(B). The heatmap shows a central peak with a radius of approximately 100 units. The line graph shows the intensity profile along the x-axis, with a peak at the center. The plot is titled "Intensity Slices" and includes a legend for intensity values.</p>
6(R)		 <p>Intensity Slices plot for 6(R). The plot shows a central peak with a radius of approximately 100 units. The intensity is highest at the center and decreases towards the edges. The plot is titled "Intensity Slices" and includes a legend for intensity values.</p>	 <p>Heatmap and line graph for 6(R). The heatmap shows a central peak with a radius of approximately 100 units. The line graph shows the intensity profile along the x-axis, with a peak at the center. The plot is titled "Intensity Slices" and includes a legend for intensity values.</p>
